SUMMARY

To secure a position in the IT field where I can apply my strong academic foundation and passion for technology to contribute to the company's success. I aim to leverage my skills in systems development, technical support, and IT operations while gaining hands-on experience and a deeper understanding of the local tech industry.

EXPERIENCE

Web Developer (Internship) - Highly Succeed Inc. January, 2026 – March, 2026

- Developed and maintained responsive web and mobile application features using React Native, JavaScript, Tailwind CSS, HTML, and Vite.
- Collaborated with designers to translate UI/UX designs into functional, user-friendly interfaces.
- Built scalable and reusable frontend components while integrating backend services using Supabase.

Quality Assurance (Internship) - Highly Succeed Inc. January, 2026 – March, 2026

- Conducted manual testing on Unleash: Super Pet Lifestyle App to identify bugs and ensure functionality meets requirements.
 - Used Jira to document, track, and manage reported issues, improving team coordination and resolution efficiency.
 - Collaborated with the development team to validate features, report defects, and support overall quality assurance processes.
-

EDUCATION

Bulacan State University - Malolos, Bulacan 2022 – 2026

- Bachelor of Science in Information Technology, Major in Web and Mobile App Development
 - Dean's Lister (2023 - 2024)
 - Cum Laude
-

-

PROJECTS

Unleash Inventory Management System – Highly Succeed Inc. January, 2026 – March, 2026

- Planned project timelines, delegated tasks, and tracked milestones to ensure on-time delivery.
- Coordinated with stakeholders to gather and analyze system requirements.
- Translated business needs into functional system features and development tasks.

HSI Payroll Management System – Highly Succeed Inc.

January, 2026 – March, 2026

- Created a detailed BRD to define system requirements and align stakeholders.
- Developed the system using React Native, Tailwind CSS, Javascript, HTML and Supabase
- Coordinated the team to ensure smooth workflow and successful project execution.

Barangay iRescue - Capstone Project

June, 2025 – November, 2025

- Designed and developed responsive user interfaces using PHP, HTML, JavaScript, and Node.js.
- Created intuitive UI/UX designs, including wireframes and user flows for real-time emergency reporting.
- Led the team by managing tasks, coordinating development, and ensuring timely project completion.

Personal Professional Portfolio - Personal Project

February, 2026 – March, 2026

- Developed a responsive personal portfolio website using React Native, JavaScript, Tailwind CSS, Vite, and HTML.
- Designed and implemented modern UI components to showcase projects, skills, and professional experience.
- Optimized performance and ensured functionalities for a smooth user experience.

Fact Attack – School Project

October, 2025– November, 2025

- Developed a full-stack web application using Django, JavaScript, HTML, and CSS.
- Designed interactive UI components and dynamic features to improve user engagement
- Managed database integration and server-side logic in Django.

Sortify - School Project

March, 2025 – May, 2025

- Developed a productivity app for task management and class scheduling using Android Studio (Java/Kotlin).
- Designed and implemented frontend and backend functionalities for user interaction and data handling.
- Integrated features such as to-do lists, schedule tracking, and user-friendly navigation.

Knight's Trial - School Project

March, 2025 – May, 2025

- Designed game mechanics, level progression, and interactive gameplay using Unity and C#.
- Developed core game features, including player controls, scoring system, and UI elements.
- Coordinated development tasks and ensured timely completion of all game levels.

SKILLS
